# S. W. ECCLES AND THE NEVADA CON

Popular Official States That Steam Shovels Will Soon Be at Work.

SPLENDID ERA FOR NOTED MINE IN SIGHT

Makes Good Suggestion That Railroad Circles Should Take Heed Of.

That things are assuming shape for business in earnest upon the Ely possessions of the Nevada Consolidated Copper company, was vouched for Wednesday by S. W. Eccles, vice-president of this noted organization. Mr. Eccles, who is the president of the Nevada Northern Railroad company and vicepresident of the American Smelting and president of the American Smelting and Redning company, reached this city Wednesday morning from his eastern headquarters, and when seen by The Tribune he stated that his present visit was one of the series he makes each year to the West in order to get into personal contact with things generally. Friday evening he will proceed to fly, where he will look into the Nevada. Consolidated company's affairs. He experts the railroad from fly to be compicted up the canyon and to the Nevada onsolidated property in two weeks.

pieted up the canyon and to the Nevada onsolidated property in two weeks time, after which the company's steam shovels will be conveyed to the scene of their future activity and started upon their task of stripping the overburden from the property. Mr. Eccles states that the road to the smeller at Currys should be finished within a very short time, then the company will begin loading the bins there with rock preduced or brought to light by the steam shovels. Thus it will be seen that the Nevada Consolidated is fast approaching its era of initial usefunces, an era ing its era of initial usefulness, an era which is so generally appreciated that which is so generally appreciated that no additional enlargement is necessary.

Mr. Eccles states that the railroad company has given orders for several new and powerful engines and dumpears, and the most modern equipment in every way is to add to the efficiency of the company's effort. In speaking about the Nevada Northern read, Mr. Eccles points out that the Western Pacific is due to connect with the line

cific is due to connect with the line within the next few weeks, by August I in fact, and with this connection established there should be a through train put on from Sait Lake to Ely at once. There is a through sleeper at this time, but in order to encourage and properly handle local traffic Mr. Eccles states there should be a through frain service, leaving Salt Lake in the morning and reaching Ely in the evening of the same day. This would result greatly to the benefit of Salt Lake and all White Pine county.

During his stay in Utah, Mr. Eccles will make an inspection of the Guggencific is due to connect with the

will make an inspection of the Guggen-heim sniellers, both at Murray and at Garfield. When asked regarding the re-ports from the East that the Garfield amelter was proving a failure, Mr. Ec-cles replied that he had not seen or cles replied that he had not seen or heard of such reports, but the fact that the company was going ahead with the plans to double the present capacity of the plant would appear to him pretty conclusive evidence that present operations and present modes of construction were along correct lines. He was in consultation with Pope Yeatman, general manager of the Nevada Consolidated and Cumberiand Ely companies and others of the Ely engineers vesterday, and upon his return to this city from Ely he will proceed to his ranch in Idaho to spend several days.

### MARKHAM GULCH MILL

New Bingham Plant In Making Very day were as follow Fine Saving of Values.

Fine Saving of Values.

From the kind of value saving being effected by the Markham Guleh Milling company up Bingham canyon, it is more than apparent that the new plant of the comeany is one of the successes of the season in ore concentration. During the present month this mill is treating the ores from the Ulah Development Red Wing mine, handling about 100 tons of rock per day. The tailings show a very small percentage of values, running 2 ources silver and 2 per cent copper to the ten. The management is making concentrales very fast, and they are of splendid value.

concentrates very fash, and they are of splendid value.

The Markham Guich concentrating plant was constructed for the purpose of treating the Red Wing and the Utah Apex ores. As the null now stands, it is the first unit, and will be added to as the company demands increase he yend present measure. It is making possible a new era for both the Red Wing and Utah Apex, bringing splendid tomages of milling grade ore into commercial form. The contention between the Markham Guich company and the criticions of Bingham over the use of tween the Markham Guich company and the citizens of Bingham over the use of the water flowing in the canyon is un-der process of adjustment, and that this will result favorably to both sides is a matter of certainty.

### COPPER RIVER ALASKA

G. E. Gunn Leaves to Look Over Prop. | Iron Silver ... 2.25 Standard ... 1.50

erty in Interest Center.

Instead of proceeding to New York from this city as expected vesterday on mining business. George E. Gunn, the well-known mining engineer and the mea who brought the funderland Elyproperty up to its present high standard of efficiency, left at noon Wednesday for the Copper River copper section of Alaska, where he is interested. Mr. Gunn is associated with powerful New York interests in this new red metal bonanca nest, the organization being somewhat of a counter poise to that of the Guggenheims. It is the latter people who are building a road into the section, and everything is being arranged according to the Guggenheim plan, which means millions of expenditures in order to bring the efficiency up to the highest possible standard. Mr. Gunu will be absent for several weeks. erty in Interest Center.

### Ore Shipments.

The Pioneer ore sampler Wednesday released 11 cars of ore from the Utah mining camps.

The Taylor & Brunton company released the following: Nevada, 4; California, 1; Utah, 14.

J. OBERNDORFER, STOCK BROKER, 161 S. Main. Tel. Bell 792,

## LUDWIG MINE NOW MAKES GOOD RECORD

Nevada Douglas Company Is Meeting With Some Very Satisfactory Returns.

In giving the famous Ludwig property at Yerington a trying out in order to demonstrate its merits beyond all question, the Nevada Douglas manage ment finds very little difficulty in mak ing their efforts tell along very satis factory lines. Manager W. C. Orem stated yesterday that the mine manstated yesterday that the mine management reports on the 6th of the month there were 150 tons of shipping ore on hands, and by the 12th of the present month this amount had been increased by 135 tons additional. Most of this rock is the result of simply development work, as two-thirds of the force now employed in the mine is doing development work alone. Stoping ores, therefore, is an incidental part of the company programme.

This rock will run at least 15 per cent copper and above, and-it is being sent into the market as quickly as the management can send it out. There are five cars of ore now en route from the mine, all which will average be-

the mine, all which will average be tween 15 and 20 per cent red metal The company has what might be termed

tween 15 and 20 per cent red metal. The company has what might be termed a freak shipment en route to this market. Shortly before the Nevada Douglas company took over the Ludwig, the owners experimented with the water in the mine for the purpose of saving its copper contents. This water will run from 0.6 to 1 per cent copper, and six tons of copper cement or precipitates averaging 50 per cent red metal are expected at any day.

Some of the above tounage of shipping ore, about twenty tons, came from the work being done on the 550-foot level. This is the deepest level on the group so far, and it is interesting for the reason that the sulphides are coming in there. Seven and a half shifts extracted the twenty tons, whose value is 14.39 per cent red metal. In the apraise from the 550-foot level, now up twenty-eight feet, the average value secured from across the back is 7.9 per cent copper. This is virgin ground, and is coming out with results quite to the satisfaction of those in charge. The upraise from the 400-foot level produced twenty one tons of shipping ore during the development work last week, and there was a large amount of lower grade of ore developed, but left untouched.

Local circles deem such developments

grace of ore developed, but left untouched.

Local circles deem such developments as these part and parcel of the argument that will force the Nevada Douglas company to complete the bargain and become absolute owner of the Ludwig property. It is pretty safe to preduct that the option will be exercised, and that the Ludwig will find itself the property of the logical organization at Verington to take it over. The group though small cuts a bite out of the Nevada Douglas' great acreage that will look better on the map, at least, if colored by one and the same color of chalk,

## EMERY COUNTY ORE.

Nevada Miners Like Looks of Red Metal Rock of Utah. Nelson Bros. and Thomas Rock

The Nelson Bros. and Thomas Rockhill of Elv. Nev., have unquestionably
opened up an excellent ore deposit on
Bench mountain, near Muddy creek, in
Emery county. One assay recently
made shows a value of 30 per cent copper and 15 counces of silver. The John
Nelson brothers are sons-in-law of Chris
Madsen of Cleveland, and the boys were
formerly citizens of Mayfield, Sanpete
county. Mr. Rockbill is one of the
lucky men of Elv, and the trio propose
to begin work at once on the property
here, which includes a dozen claims, and
thoroughly exploit it. If any great
body of ore is found they will put in
a plant that will treat the output on the
ground.—Emery Progress. ground. - Emery Progress,

DAY ON 'CHANGE.

Remarkable Business, Mostly in Tintics, Transacted Wednesday.

tics, Transacted Wednesday.

It is remarkable how splendidly business keeps up on the local exchange, the Tintles taking the lead and holding it without a tremble. Wednesday was one of the big days, and brokers were so anxious to buy and sell that most of the time during the calls was taken up by Caller Beveridge in the attempt to untangle the knots tied by haste. For two or three hours during the day he is the businest man in the city. The newspaper men who must rescue bids and sales on unlisted stocks from the howling mass of humanity surrounding the rall appreciate this. Wednesday a total of 11,112 shares of stock passed hands representing a market value of \$83,877.25. The following were the unlisted stock transactions:

#### UTAH SMELTING CO. OGDEN, UTAH. BUYERS OF ORES.

## **NEW SILVER KING** PAYS DIVIDEND

Directors on Wednesday Meet and Post Three Per Cent on Capitalization.

IS PAYABLE ON LAST OF MONTH

Familiar Name Once More Is Found Upon Utah's List

of Earners.

As per schedule, the newly organized Silver King Coalition Mines company started on Wednesday to add to the grand total of dividends paid by Utah mines during 1907 by posting what supposedly is the first quarterly dividend. It is the first dividend, however, to be declared by the new organization. The directors unanimously passed a resolution at the meeting yesterday afternoon to check out an amount equaling \$187.000, or three per cent of a capitalization of \$6,250,000. This handsome bunch of profits is pavable on the 31st day of July to all stockholders of record on the 27th, the books to reopen on August 1st.

The Silver King Coalition is that organization that recently took over a splendid acreage of Park City ground, including the noted Silver King mine, the Kearns-Keith, St. Louis Magnolia and numerous other groups stretching out over the district in such a fashion that its domains are not to be measured by acres but by miles. In addition to this area of mineral territory the company starts upon its long and successful career with a handsome treasury fund, and a concentrating plant which is being remodeled so as to bring

successful career with a handsome treasury fund, and a concentrating plant which is being remodeled so as to bring its capacity up to nearly double what it is at present.

With the virgin ground that this organization possesses at Park City, the developments during the coming several years should be of the most engrossing character, and that the campaign of profit sharing just started will endure for years is generally admitted as a matter of fact. It means many more millions thrown in the laps of fortunate stockholders, practically all of whom are Utahns. It also means that the familiar name, Silver King, is no longer to be found absent on the dividend list. The old Silver King company several months ago suspended dividend payments by agreement until the present organization had been perfected.

Mining Notes. Will Dooly, the well-known mining man, leaves today for a visit to Park

T. R. Woodbridge, vice-president of the Taylor & Brunton Ore Sampling company, is in Denver on a business

captain G. T. Bridges, the well-known mining man of Milford, is at present in Salt Lake confined to his room with a severe attack of rheumatism. It is to be hoped he will soon be able to be around again and able to oversee the development of some of the many valuable properties in which he is interested.

Ask your gracer for the Vienna Walcut Bread.

Manager Morningstar's Report.

Manager Morningstar's Report.

Freeman Morningstar, general manager of the Nevada Bonanza Copper company, received, yesterday, from the company's required, yesterday, from the company's required. He mineralization of the Emerald Hills, El Paso and Revenue groups of mining claims. These groups form the entire acreage owned by the corporation, and aggregate nearly 620 acres. This is the largest acreage of any property in the great Verington camp, and the greater portion of the property almost surrounds the famous Ludwig mine, and lies directly between the rich properties belonging to the two greatest mines of the camp—the Nevada Douglas and the Bluestone.

Mr. Morningstar, accompanied by seme friends, will leave for Morningstar City and the mine this afternoon, and Captain E. P. Jennings, the well-known mining engineer of this city, will be with the party. Mr. Jennings goes to inspect the company's properties with a view of making a report thereon.

ASSESSMENT NO. 9.

Butler-Liberal Consolidated Mining company. Principal place of business. Sait Lake City. Utah.

Notice is hereby given that at a meeting of the directore held on the 5th day of July, 1997, an assessment of one cent (ic) per share was levied on the capital stock of the corporation, payable immediately to F. M. Orem, secretary, at the offices of the company, 205-308 Auerbach building, Sait Lake City, Utah.

Any stock upon which this assessment may remain unnaid on Saturday, the 19th day of August, 1907, will be delinquent and advertised for sale at public auction, and unless payment is made before will be sold on Saturday, the 31st day of August, 1907, at 1:30 p. m., to pay the delinquent assessment, together with the cost of advertising and expanse of sale.

F. M. CREM, Secretary.

# GOLD AND COPPER IN GOLD BASIN REGION

Arizona Section Is Opening Up Into Attractive Point for Capital.

Down in Arizona in what is known to fame as the Gold Basin section is a revival of mining after many years of neglect, the field being now well covered by the prespector. C. C. McCann, of Crippie Creek, is in the city on mining business, and he brought with him from the Gold Basin region a handsome line of ore samples just to show local friends what this portion of Arizona is capable of producing. The area shows splendid copper values, while another class shows tree gold in generous profusion. Mr. McCann states that the ore was taken from a large area of territory more for the purpose of demonstrating how well mineralized the country there is.

Over thirty years ago Gold Basin was an active center of mining. And since that time there has been a desultory character of work done here and there, but in a manner unknown to fame. As yet the man of capital has not been called there in any great profusion, but his predecessor, the prospector, is there in full force, and the results that he is securing at this time are well calculated in time to draw the man of money into the camp. Mr. McCann, who has prospected all ever Navada, stated yesterday that he had never found in the Sage brush State any such surface showings as are to be seen in Gold Basin. The district is distinctive in its great system of fissures that draw like network over a very large area.

The center of the section is about fitty-five miles from a railroad, the mearest shipping point being Hackberry. It would be a small matter to drop a railroad into the district if strong enough talent can become interested in the camp, and some very attractive showings in the red metal are being registered to that end. Mr. McCann shows copper ore that will run extremely high, and he states that there is a liberal amount of copper glance already shown up in different portions of the region.
